

CS 467: Icebreaker

Technical Strengths

I prefer programming in C/C++, and I like coming up with elegant algorithms.

Programming Skill	Level
C	high
C++	high
Java	medium
2d graphics	high
3d graphics/openGL	medium
audio	low
enemy AI	low
machine learning	medium
network	low
physics	low

Technical Weaknesses

I am not good at web development. I don't know Python and barely know Ruby. I have no iOS or Apple experience, and *very* limited Android experience. I have very limited version control experience, and may need some help with that. I would prefer to focus on the technical side of the project, and let others do the art, sound effects, music, and design.

Interests

My programming interests include audio, graphics, physics simulation, operating system design, information processing, and machine learning. Other interests include bicycling, hiking, ergonomics, structural engineering, symphonic metal, and Buddhism.
